

BASIC SERIES INTRODUCTION

The BASIC SERIES offers a cost effective solution for smaller networks where full duplex, party-line communication is required. The interconnect system is based on a standard, balanced mic cable with XLR-3 connectors. The installation requires no expert knowledge and the superior control layout allows comfortable operation.

High quality push-pull headphone amplifiers are employed and the complete system offers a frequency response of 200Hz to 13kHz with a dynamic range of 80dB. Special proprietary frequency contouring circuitry ensures high intelligibility for voice communications. A current driven interconnect loop ensures operator listening levels do not change as stations are added or removed from the network.

BS 216 DUAL CHANNEL MASTER STATION

The BS 216 is a dual channel intercom station with a built-in, switch mode power supply and AUX input for program signals. It is housed in a 19" steel case and provides all the features necessary for a two channel communication system, in conjunction with BS 15 beltpacks.

BS 15 SINGLE CHANNEL BELTPACK

The BS 15 is a portable 1-channel intercom station, housed in a strong ABS case and provided with a belt clip.

The unit is powered via the intercom line by a BS 216 master station or a BS 181 / BS 286 power supply.

FEATURES BS 216

(further explained on page 2 + 3)

- Power Supply Section
The switch mode power supply is designed to safely drive fifteen BS15 beltpacks, when each is driven to full volume.
- TALK and CALL Buttons & LEDs
- Volume Control (Listen Level)
- Aux Input
volume control for each channel
