GENERAL

DynamicX2 monitors have been designed for installation into tables or desks.

DynamicX2 are elegant monitors built from a solid aluminium block. They have a vertical motorised movement with automatic 20° inclination to ensure the best ergonomics, viewing angle and visibility. This automatic tilting system provides a fast and silent response and highly reliable, maintenance-free solution. DynamicX2 have slightly curved edges for a contemporary and longstanding look. The range is available from 15" to 22" and it can be supplied with adjustable tilt, touch screen, camera, single or double retractable microphones, speakers, voting system and multimedia connectors among others.

The anodised aluminium housing can be customised in different colours and finishes. The safety system stops the movement if any resistance is detected for a secure environment.

The standard top-table cover plate is made of brushed stainless steel. It can optionally be supplied with a matt finish or it can disappear when the product is prepared for underneath installation.

DynamicX2 monitors are remotely controllable and diagnosable through the ERT interfaces in an easy and cost effective way.

ARCHITECT'S SPECIFICATIONS

Low voltage professional electrically retractable 15.6" monitor with 20 degrees of automatic inclination. Solid block of aluminium monitor housing in natural anodized finishing, with rounded corners design. Front double sided anti-reflective 3 mm black-edged glass. Passive opening cover plate for enhanced reliability. DVI-I and DVI-D connectors, HDCP compliant inputs.

Compatible with AHnet open protocol over RS-422, allowing individual remote control of up to 30 units per line over a daisy chain CAT-5 or CAT-6 line and control up to 900 monitors using the AHnet Control System. Additional control by means of the buttons integrated on the cover plate that can be activated or deactivated by

using the AHnet protocol. Easy to read Interactive Set-Up Display (ISD) 1.6" LCD display for address setup and status monitoring. Dual Pulse Time safety system that detects obstructions, stopping the unit. External power supply with 4-Pin XLR4 connector.

Bottom connectivity for easy access and removal of monitor. Monitor housing total depth is 590 mm, plus additional spacing for connectors. Adjustable parameters through AHnet or ISD allowing calibration and adjustment of mechanics. Diagnostic readout on ISD for service and support.
