### GENERAL

DynamicX2 monitors have been designed for installation into tables or desks.

DynamicX2 are elegant monitors built from a solid aluminium block. They have a vertical motorised movement with automatic 20° inclination to ensure the best ergonomics, viewing angle and visibility. This automatic tilting system provides a fast and silent response and highly reliable, maintenance-free solution. DynamicX2 have slightly curved edges for a contemporary and longstanding look. The range is available in Full HD from 15" to 22" and it can be supplied with adjustable tilt, touch screen, camera, single or double retractable microphones, speakers, voting system and multimedia connectors among others.

The anodised aluminium housing can be customised in different colours and finishes. The safety system stops the movement if any resistance is detected for a secure environment.

The standard top-table cover plate is made of brushed stainless steel. It can optionally be supplied with a matt finish or it can disappear when the product is prepared for underneath installation.

DynamicX2 monitors are remotely controllable and diagnosable through the ERT interfaces in an easy and cost effective way.
