- Gold-plated 3-pin XLR output connector for highest signal integrity
- Rugged construction with satin nickel-plated brass body
- Stand adapter, windscreen and transport case included
- 3-Year Warranty Program*
- Conceived and designed by BEHRINGER Germany

The single-diaphragm B-5 microphone is a home recording enthusiast's dream come true! The B-5 comes with interchangeable cardioid and omnidirectional capsules, making it a fantastic all-purpose condenser microphone. It is designed to capture your sounds with incredible realism, sensitivity and accuracy, and is perfect for acoustic instruments, vocals and overhead miking – and rugged enough to go the distance! With a heavy duty suspension mount and windscreen included in the sleek aluminum case, the B-5 just may be the only microphone your studio will need.

What is a Condenser Mic?

Condenser microphones are the ideal choice for capturing vocals and acoustic instruments. They are the primary type of microphone used in recording studios and radio stations. The B-5 mic is capable of capturing much more detail than most dynamic microphones because of its wider and flatter frequency response. Another difference between condenser and dynamic mics is they contain active circuitry that requires phantom power (+48 V) for operation. You can power your B-5 using any phantom power equipped BEHRINGER XENYX mixer – plus enjoy the benefits of our state-of-the-art XENYX mic preamps.

B-5

Gold-Sputtered Diaphragm Studio Condenser Microphone with 2 Interchangeable Capsules

Why the B-5?

The B-5 is an affordable, high-quality way to put a gold-sputtered diaphragm condenser mic to work for you. It comes with two interchangeable capsules: omnidirectional for picking up sound on all sides of the mic, and cardiod for picking up the source signal while shunning off-axis sound. With its excellent transducer and gold-plated XLR output, the B-5 is very neutral sounding and truly delivers on the promise of noise-free transmission. It also features a switchable -10 dB attenuator to capture high-volume signal sources without distorting, as well as a low-cut filter to eliminate infrasonics caused by floor rumble and other turbulance.

But That's Not All…

The B-5 condenser microphone is designed to be your go-to studio mic for many years to come. The tough, die-cast metal body can withstand the rigors of all those late-night recording marathons – and the included carrying case ensures your B-5 always travels in safety and style.

An excellent choice for both live and recording applications, the studio-grade B-5 condenser microphone is available at a price that will leave enough cash left over to secure other recording essentials. Check out the incredible B-5 at a dealer near you.

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own MUSIC Group factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous 3-Year Warranty program.
