# DIGITAL PRO MIXER DDM4000

Ultimate 5-Channel Digital DJ Mixer with Sampler, 4 FX Sections, Dual BPM Counters and MIDI

- 32-bit digital DJ mixer with beat-synchronized sampler, 4 multi-FX sections, 2 BPM counters, digital crossfader and MIDI
- 4 Phono/Line stereo channels allowing up to 8 signal sources to be connected simultaneously
- 2 microphone inputs with Gain, EQ, Talk function and FX
- 4 stereo channels with Gain, programmable parametric 3-band EQ with Kill function, fader curve control and flexible crossfader assignment
- Fully featured MIDI controller for your DJ software
- Sophisticated sampler with beat-controlled loop function, real-time pitch control, sampler FX and crossfader start option
- 2 freely assignable and BPM-synchronized, high-quality FX engines (Bitcrusher, Resonator, Reverb, Flanger, etc.)
- Ultra-fast, and accurate BPM counters for automatic BPM synchronization of sampler, FX, crossfader and external drum machines, etc. via MIDI
- Digital crossfader with flexible curve adjustment, reverse button and automatic, BPM-synchronized crossfading
- Dual-mode crossfader with innovative frequency-selective crossfading
- Dedicated headphones section includes PFL mix/split and bass/snare boost functions

Jam-packed with incredibly-creative tools, the DDM4000 is a state-of-the-art 5-channel, 32-bit digital DJ mixer that includes: a beat-synchronized Sampler; 4 Multi-FX sections; 2 BPM counters; a Digital Ultracurve Crossfader; and a MIDI controller for your software – plus much more. In spite of this veritable treasure trove of features and functionality, the DDM4000's intuitive layout will make you instantly feel at home – at first touch!

Hook up your turntables and CD/mp3 players to its 4 stereo channels, each with fully-programmable EQ and Kill switches. Enjoy the ultimate versatility at your fingertips with the fully-programmable beat-sync'able Multi-FX modules, pair of high-precision BPM counters and ultra-smooth digital crossfader with custom curve adjustment. And the super-cool BPM-sync'd sampler with real-time Pitch control, Loop and Reverse functions will have your crowd going absolutely wild!

# DIGITAL PRO MIXER DDM4000

Ultimate 5-Channel Digital DJ Mixer with Sampler, 4 FX Sections, Dual BPM Counters and MIDI

- Recall your last mixer setting at the push of a button
- Digital S/PDIF output for direct recording of your performance
- Rack mount brackets included for ultimate flexibility
- 3-Year Warranty Program*
- Conceived and designed by BEHRINGER Germany

## Choose Your Channel

The DDM4000 features 5 independent channels. Channels 1 - 4 are crossfader-assignable stereo channels, with Phono/Line Level toggle switches that make them suitable for your vinyl and CD/mp3 players. All channels feature 3-band digital EQs with up to 12 dB of boost and infinite cut option (Kill), and can be monitored directly via headphones thanks to the PFL switch above the fader. A dedicated Mic channel is provided in mono, with 2 XLR Mic Inputs and features a special Talk feature that attenuates the volume of the stereo channels (ducking), ensuring your announcements will be heard loud and clear over the music. The Mic channel also has its own FX section – which can be applied with a single button.

## First-Class Crossfader

The core functionality of the DDM4000 can be found in its Digital Ultracurve Crossfader, which is equipped with Reverse Tap and Hold buttons, plus automatic BPM-synchronized crossfading. Smooth and ultra-responsive, this First-Class Crossfader can be assigned to any of channels 1 - 4, and sports a trio of 3-band EQ Kill buttons on either side. The curve sensitivity is adjustable, and in the unlikely event you ever wear it out, the Crossfader itself is easy to replace.

*Warranty details can be found at music-group.com.

## Step Up Your Sampling

DDM4000's BPM-synced sampler is a highly sought-after feature, which allows you to record a segment of incoming audio and loop it continuously – without dropping the beat. Once your track is looping from the sampler, you can swap discs, queue up your new tracks and mix them back in – for totally seamless transitions!

## BPM-Sync'd FX

Our BPM-Counter technology has even found its way into the DDM4000's incredible dual FX section, which allows it to read and display the BPM of 2 different inputs and then apply BPM-synchronized effects, such as echo, to the beat of the music. Effects such as Bitcrusher, Reverb, Delay, Pitch Shift and more are available – and can be assigned independently to multiple channels.

## Own the Night!

The DDM4000 is the ideal digital mixer for the DJ who is on the way to the top, or the club owner who has multiple DJs performing on a recurring basis. All preferences, such as fader curve, FX settings, EQ, Kill frequencies, etc., can be stored in individual user accounts and recalled instantly. This feature alone can completely eliminate the changeover time between DJs – so the party never stops! With the amazing DDM4000 in the hands of an experienced DJ, at a cost that will have you smiling all the way to the bank – you truly can own the night!

Grab a DDM4000 from your nearest authorized BEHRINGER dealer, or place your order online – and start spinning sets sure to catapult you directly to star status!
