- Stereo Headphone output with dedicated Level control
- Dual high-bandwidth FireWire connectors for more flexibility
- Powered via FireWire bus or included power adapter for use with 4-pin FireWire PCs
- Powerful DAW software included
- Standard port for Kensington* security lock provided
- 3-Year Warranty Program*
- Conceived and designed by BEHRINGER Germany

The BEHRINGER FCA202 allows you to connect instruments and other audio devices to your computer, effectively merging the analog and digital worlds. It accomplishes this via 2 analog mono Inputs and Outputs (for monitoring) and FireWire connectivity for direct analog-to-digital conversion. The stereo headphone output features a dedicated level control and lets you listen to both the input and output. We even give you some pretty amazing software that you will need to get your dreams off the ground!

Your Portal to the Digital Domain

The FCA202 allows you to converse with your computer in a language it understands – digital. When you connect line-level devices, such as synthesizers, electronic drums or the outputs of an audio mixer to the FCA202, its 24-bit A/D (Analog to Digital) converters swing into action, turning the audio signal into digital data. Now your computer has something it can work with. You can record your performance and play back your masterpiece through a pair of studio monitors, which can be connected to the FCA202's outputs, or you can listen using headphones.

PC and Mac Ready

This ultra-compact, FireWire or adaptor-powered device lets you connect your PC or Mac computer to virtually any piece of audio gear. It can be powered from either your computer's FireWire port, or via the included external power supply.

Getting Connected

On the rear panel of FCA202, you'll find two FireWire sockets, one for your computer, the other for an optional external drive. Inputs are ¼" unbalanced jacks that accept a wide range of line-level devices. Outputs accept both balanced and unbalanced ¼" connections. The headphones jack is conveniently located on the front panel, along with its own dedicated volume control.

The Technical Stuff

The state-of-the-art FCA202 features high-resolution 24-bit A/D and D/A converters, supporting up to a 96 kHz sampling rate. Reliable Windows XP®, Windows Vista® (32-bit) and Mac OS® X drivers ensure ultra-low latency operation.

Tons of Free Software

To truly get the most out of your FCA202, you will need recording and editing software. So, we made it easy, providing a single place for you to download lots of free software including Audacity, Golden Ear and several other highly-acclaimed titles.

With Audacity you can:

- Record live audio
- Convert tapes and records into digital recordings or CDs
- Edit Ogg Vorbis, MP3, WAV or AIFF sound files
- Cut, copy, splice or mix sounds together
- Change the speed or pitch of a recording
- And much more…

Compose. Record. Mix. Share.

Tracktion is one of the world's fastest and easiest Digital Audio Workstations (DAW) for composing, recording, editing, mixing and sharing your music with the world. Featuring a single-screen interface, and pushing the envelope in design elegance, Tracktion brings together outstanding Pro DAW features, such as dynamic automation, unlimited track count, MIDI recording and support for VST and AU plug-ins. This powerful music production software gives you all the tools of an entire professional-grade recording studio. Learning a DAW has never been easier, thanks to their vast and readily available library of resources.

As our way of saying "Thank You" when you register your XENYX QX1202USB at behringer.com, we'll reward you with a complimentary download code for the full version of Tracktion. Recording and editing couldn't be easier. To learn more, visit tracktion.com/support/videos.

Share the Love. Visit tracktion.com for more.
