Microphone Preamplifiers

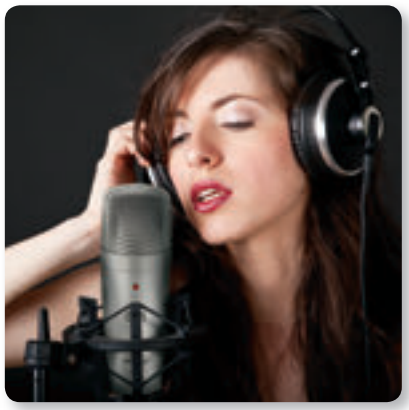

TUBE ULTRAGAIN MIC500USB

Audiophile Vacuum Tube Preamplifier with Preamp Modeling Technology and USB/Audio Interface

- High-end pre-amplification for all microphone, instrument and line-level sources. Specifically designed for studio-grade condenser mics
- Perfectly matches your studio, live and hard disk recording set-up
- Ultra-flexible Preamp Modeling allows you to optimize your recordings
- Choose between 16 preamp voicings designed for electric and acoustic guitars, keyboards, bass guitars, drums, vocals and more
- Built-in USB/Audio Interface to connect directly to your computer. Free audio recording, editing and podcasting software plus 150 instrument/effect plug-ins downloadable at behringer.com
- Powerful Phones output with Level control and Direct Monitor select
- Hand-selected 12AX7 vacuum tube with UTC technology for exceptional warmth and lowest noise
- Ensures outstanding signal transparency when used as a high-end DI-box
- Sophisticated output limiter prevents the output signal from clipping
- Dedicated low cut filter eliminates unwanted noise, e.g. floor rumble
- +48 V phantom power, Phase Reverse switch and 20 dB Pad for utmost flexibility
- Highly accurate 8-segment LED level meter

Tubes can really warm up a signal fast, giving it depth and character. Though transistors have succeeded the technology, many musicians agree that tubes deliver a far superior sound. The TUBE ULTRAGAIN MIC500USB's hand-selected 12AX7 vacuum tube gives everything from microphones to acoustic or bass guitars that vintage tube vibe – in a dependable and ultra-affordable package.

Put A Little Tube In Your Tone

The MIC500USB is perfect for studio and live applications. The balanced XLR and ¼" TRS inputs give you maximum flexibility in either scenario. It derives its personality from a hand-selected 12AX7 tube with UTC technology for superior tube character and low-noise operation. The MIC500USB is ideally suited for use with standard digital recorders and sound cards, imbuing signals with the warmth, presence and classic tube-compression that will bring your digital tracks to life.

The incredible MIC500USB's controls consist of: switches for +48 V phantom power, 20 dB pad, Phase Reverse and Limiter; plus vintage-style Gain and Output knobs. An 8-segment LED meter provides accurate monitoring of output levels. And when used as a high-end DI (Direct Injection) box in the studio or on the stage, the MIC500USB delivers flawless performance and outstanding signal integrity.

- Designed and engineered in Germany

A Voice All Your Own

To help you get the most from your new MIC500USB, we've provided 16 unique preamp voicings that cover a wide range of applications – including vocals, acoustic and electric guitars, bass, keyboards and more. Options include: Neutral, for a more natural sound; Warm, for adding the warmth typically associated with analog signals and vacuum tubes; Warm + Limiter, for additional warmth when working with high volume levels, sounds with frequent signal peaks, or directly recording an instrument with a mic (e.g., drums); and Limiter, for adding density and a consistent output level of all notes/sounds below clipping.

Although these voicings have been optimized for specific sound sources, feel free to experiment – you just might find that running vocals through the Warm E-GTR setting is perfect for your project. The amazing MIC500USB opens an entirely new and exciting world of creative possibilities!

Recording Bliss

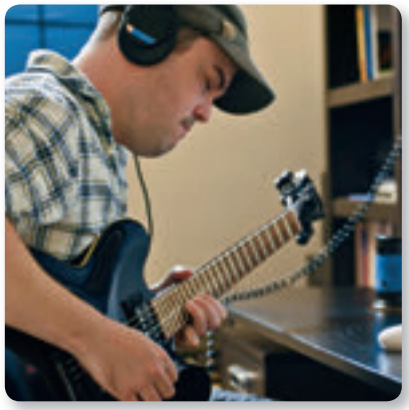

There was a time when the recording process called for lots and lots of expensive gear, which meant the average musician had to buy time at a recording studio – and that time was pricey indeed. But modern technology has put personal recording well within the reach of virtually anyone with access to a computer. How do you get all that music flying around your brain into your computer? That's where the MIC500USB comes in. Thanks to the built-in USB audio interface, you can connect directly to your PC or Mac computer via a single USB cable. Now any signal source you connect to the MIC500USB can be recorded directly to your hard drive. Which brings us to software…

Vintage Sound, Modern Value

The MIC500USB gives you the sound quality of a vintage tube preamp and high-end DI box all-in-one – at a mere fraction of what a true relic of the 1960s would cost, plus the built-in USB audio interface lets you record straight to your computer. At a price this low, you owe it to yourself to find out where the MIC500USB's real tube tone can take your sound. Try one out at your local BEHRINGER dealer, or order yours online today!

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own MUSIC Group factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous 3-Year Warranty program.
