MZH 3015, MZH 3040, MZH 3042, MZH 3062, MZH 3072

Goosenecks of various shapes and lengths allow you to place the microphone heads ME 34, ME 35 or ME 36 unobtrusively but close to the speaker. The mic heads are fixed on a slender (Ø 6 mm, 1/4''), very rugged, matte-black gooseneck with a special anti-reflective coating or are available in non-reflective NEXTEL® gray. One or two flexible elements ensure the optimal alignment of the microphone head. The connectors are balanced, floating XLR-3M connectors with standard polarity. Available lenghts are 15, 40, 60 and 70 cm.

- Cardioid directivity for universal miking
- Low noise and large transmission range
- Smooth response across all frequencies
- Gold plated contact points for maintenance-free long-term operation

MZH 3015-L, MZH 3040-L, MZH 3042-L, MZH 3062-L, MZH 3072-L

All MZH goosenecks are also available with a LED ring that shows who is allowed to take the floor. The L-variants are fitted with XLR-5M connectors.

- Sturdy and elegant metal gooseneck
- RF shielding against intermodulation from wireless devices
- Special screw connector for use with ME 34, ME 35, ME 36
- Integrated light ring
- Available lengths are 15, 40, 60 and 70 cm
