SOUND ISOLATING™ EARPHONES

SE215 Internal Component View

SE215 COMPONENTS

A **Rugged Ergonomic Housing**
Ergonomic and stylish design features durable, sweat-resistant construction; built to withstand the extremes of on-stage or everyday wear.

B **Single Dynamic MicroDriver**
Delivers detailed sound with enhanced bass in a very small size.

C **Acoustic Seal**
Prevents audio leaks from front to back cavity for proper acoustic performance, and provides additional shock protection for the MicroDriver.

D **Driver Support Frame**
Protects the MicroDriver from sudden impact and holds it securely in place.

E **MMCX Micro-Miniature Coaxial Connector**
Gold-plated connector has a lock-snap mechanism allowing 360 degree rotation for comfortable fit.

F **Nozzle**
Specially angled tube ensures efficient audio delivery and ergonomic fit.

G **Detachable Cable**
Allows for easy replacement or customization. Kevlar® reinforced for durability, and wireform fit ensures secure placement over the ear.

H **Sound Isolating™ Sleeve**
Selection of foam and flex sleeves create a customized fit and comfortable seal that blocks background noise.
